

ISKALO'S ELECTRIC TOWER HOSTS DOWNTOWN HOUSING TOUR

Event Draws More Than 200 to Landmark Building

The historic Electric Tower, owned by Iskalo Development, served as the registration site for the Downtown Housing Tour on June 27, 2009, a Buffalo Niagara Homecoming Citybration event. Over 200 visitors stopped in at the Tower's grand lobby to pick up a self-guided map book directing them on a tour through many of Downtown Buffalo's unique and modern residences.

Buffalo Niagara Homecoming Citybration is an event designed to keep the best and brightest here, to bring back those who have left, and to attract entrepreneurs and professionals to help grow the Western New York community and economy. For more information, visit www.citybration.com.

One of the most recognizable buildings in the Buffalo skyline, the Electric Tower has been returned to its original grandeur including a comprehensive restoration of the building lobby and common areas, and a full building mechanical system replacement. The building combines modern office amenities with the charm and character present only in a true landmark setting. For more information on the Electric Tower, visit www.electrictower.com.
